

## GRANULATED SULPHUR

### Type 9995

#### 1. Product Quality Parameters

| Physical Properties            |                                                             | Unit                | Description / Value                  |
|--------------------------------|-------------------------------------------------------------|---------------------|--------------------------------------|
| Form                           |                                                             | -                   | Granules                             |
| Colour                         |                                                             | -                   | Yellow With Shades of Grey and Brown |
| Granulation                    | Fraction 0,5-8mm, not less than                             | %                   | 90                                   |
|                                | Fraction less than 0,5 mm and bigger than 8mm, no more than | %                   | 10                                   |
| Chemical properties            |                                                             | Unit                | Value                                |
| Sulphur Content, not less than |                                                             |                     | 99,95                                |
| Chemical Pollutants            | Overall, no more than                                       | As % of dry product | 0,05                                 |
|                                | Organic Substance, no more than                             |                     | 0,02                                 |
|                                | Acids (as H <sub>2</sub> SO <sub>4</sub> ) no more than     |                     | 0,007                                |
|                                | Arsenic, no more than                                       |                     | 0,0000                               |
|                                | Selenium, no more than                                      |                     | 0,000                                |
|                                | Ash Content, no more than                                   |                     | 0,02                                 |
| Moisture, no more than         |                                                             | %                   | 0,5                                  |

Caution: In case of a product stored without roofing, Water content above 0.5% is permissible after prior agreement with the customer.

#### 2. Packaging

Rail cars, lorries and about 1000 kg Big Bags on 0,8x1,2 m palette are used to transport granulated sulphur.

#### 3. Transport

The product is not classified as dangerous during transport by sea, air or land on the basis of special regulation No. 242, therefore it is not the subject of ADR, RID and IMDG regulations.

#### 4. Additional Information

Additional information and ways of handling the product are included in the safety data sheet.
